DOLLAR INDUSTRIES Inaugurates Solar Power Plant In Tirupur

The new 4 MW solar plant is part of the ‘Green Mission’ initiative.

Dollar Industries Limited, commissioned a 4 MW solar power plant at their manufacturing facility in Tirupur.

The new plant has a capacity of generating 75 lakhs power units annually. Dollar's objective for installing the solar plant is to not only reduce costs but also make the spinning unit at Tirupur sustainable and self-reliant.

To produce 1kg of cotton yarn, the cost of power is approximately Rs. 27-28 which is expected to feed almost 50% of the daily consumption at the spinning unit.

Moreover, the solar plant will help in curbing the CO2 emissions by 9000kgs/per day with a sustainable environment.

During the inauguration, Vinod Kumar Gupta, Managing Director, Dollar Industries Limited said, "By keeping a close watch on the development process, we maximize the utilization of water, energy and our natural resources, safeguarding the earth by reducing our carbon footprints. This project is in line with Dollar's commitment to develop renewable production capabilities to make quality products for our consumers." The plant has been commissioned by Indway Power Energy Pvt. Ltd., who is the EPC (Engineering, Procurement and Construction) partner.

MARKS & SPENCER Introduces POLYGIENE in towels

MARKS & SPENCER

Starting in October 2020, Polygiene will treat Marks & Spencer's kitchen towels. The towel is treated with Polygiene's stays fresh antimicrobial technology and is part of M & S globally distributed core programs. The yearly forecasted order value of the kitchen towels is USD 75 000.

This action is part of an international program of treated products, where more products are already under discussion.

"We see this as an exciting start of a partnership with this renowned brand and hope to see growth in their home textile area as well as in other categories going forward", said Ulrika Björk, CEO, Polygiene. "Changed consumer behavior due to the pandemic, with both increased e-commerce as well as more interest in home products, could give an extra push for this kind of products. Additionally, an antimicrobial treatment in home textiles will keep them fresh for longer and make them last for longer as well", he promises.

DURST acquires majority stake in VANGUARD

Durst, manufacturer of advanced digital printing and production technologies, has acquired a majority stake in Vanguard Digital Printing Systems, headquartered in Lawrenceville, Georgia/USA.

With the acquisition, Durst adds new printer classes to its large format portfolio, while Vanguard now has a global distribution and service network and technical resources to continue developing robust solutions.

According to the two companies, the deal, came about due to a mutual interest to expand their customer group and distribute worldwide. Under the ownership the business will be rebranded as Vanguard Durst Digital Printing Systems.

"Despite the pandemic, we are positioning ourselves for the long term and are determined to invest in the large-format graphics market. In addition, with our technical expertise, Vanguard will continue to ensure that its products and services are industry leading and a wider customer base will understand what it is like to be part of the Durst family."

- Christoph Gamper, CEO and co-owner of Durst Group.
